

St. John Broken Arrow Hospital, USA

Vistamatic® are proud to be associated with the St. John Broken Arrow Hospital project where 18 glazed secure vision panels have been specified for the patient rooms.

The \$100 million general acute care medical surgical hospital is expected to open this fall and will include a state-of-the-art emergency department, eight-room surgery suite, [radiology](#) department and renowned Tulsa Bone & Joint Associates orthopedic center. The nonprofit, full-service community hospital includes 189,000 square feet in a six-story building with a seventh story penthouse level and an adjacent 110,000-square-foot, four-story medical office building.
